Re: CR 25-07, 2025-2026 and 2026-2027 Big Game Hunting Seasons

Dear Commissioners and Director Jenne:

On behalf of Safari Club International, I would like to thank you for the opportunity to comment on the proposed CR 25-07, 2025-2026 and 2026-2027 Big Game Hunting Seasons.

The proposed CR 25-07, 2025-2026 and 2026-2027 Big Game Hunting Seasons, generally demonstrate responsible and sustainable management of many different big game species while maintaining high levels of opportunity for hunters. SCI again commends and supports the Commission and the Department regarding the continuation of a moose hunting season, a conservation success story.

SCI believes that sound science-based conservation involving hunting as the primary management tool, while maximizing opportunities for all huntable species, such as moose, elk, pronghorn, mountain goat, and bighorn sheep, is necessary to the long-term health of wildlife. Hunters have long paid the way for conservation, both game and non-game wildlife, and maximizing opportunity for hunting is also key to long-term funding for all conservation. Hunting benefits wildlife conservation.

Thank you again for the opportunity to comment on the proposed CR 25-07, 2025-202 and 2026-2027 Big Game Hunting Seasons. SCI is dedicated to protecting the freedom to hunt and we appreciate the continued partnership with the Department and the Commission. SCI is always first for hunters.

Sincerely,

W. Laird Hamberlin
Chief Executive Officer
Safari Club International
